

Capitainer® B10 Vanadate

Quantitative blood sampling card

Next generation microsampling card

Capitainer® B10 Vanadate is the next generation microsampling card based on our technology. Capitainer® B10 Vanadate is recommended when PEth is included as an analysis.

It empowers healthcare providers, researchers and laboratories across the world to provide accurate and easy to use at-home sampling solutions for their customers and patients.

Accurate

Automatically meters
2×10µl of blood

Reliable

The design eliminates
the risk of over- or
under-fill

Trusted

Successful sampling
indicator integrated in
the device

Protected sample

Sample protected from
contamination within the device

User-friendly

Simply apply one drop of
blood to the inlet
